

EnVirtualization “Blade-Up” Program

BLADE UP

Wouldn't it be great if there was a way to trade in those rack mount servers for Blade technology? Well, now there is!

Customers that purchase a virtualization solution from Envision utilizing IBM xSeries rack mount servers are now eligible for a buy-back if they upgrade to Blades within 24 months!

How it works:

1. Buy your rack mount servers as part of a virtualization project today.
2. Complete the Blade-Up registration form when you purchase your virtualization project from Envision.
3. Upgrade to Blades anytime in year two, and Envision will credit you up to \$8,000 towards your IBM BladeCenter purchase!*

It's that easy, and it's one more way that Envision is working to help our customers manage the life cycle of their virtualization investment.

* See an Envision rep for complete terms and conditions.
